

JUPITER

This technical proposal describes a Solaris JUPITER. For supervisory control and data acquisition Leonardo 3.0 is included.

The system consists of jacketed fermenter/bioreactor (total volume), bench-top, pre-assembled unit, supplied with all necessary tubes, valves and instruments, automation, control panel (HMI).

The system is designed for aerobic and anaerobic cultivations/ fermentations, closed aseptic operations. The control is based on a SCADA control system.

Customizable Configuration

differente aspect ratio and thermoregulation strategies

Process development and optimization

Education

Basic Research

Scale up and scale-down studies

Applications

Small production

- Aspect Ratio available:
 - D/H 3:1
 - D/H 2:1

- single-wall Jacketed and
- up to 5 TMFC and/or solenoid valves, jacketed design : fully removable and cleanable glass jacket for improved heat transfer during autoclaving and single-wall design: thermoregulation performed with heating blanket and cooling

- · Modbus digital sensors reduce background noise and guarantee quick response time
- · Suitable for batch, fed-batch and continuous processes

· Different gas mixing strategies with finger.

- · Wide range of measurement and control options
- Optional integration of up to 4 analog input/output connections. choosing between 0-10 V and 0-20 mA/4-20 mA (e.g. pumps or valves with power supply independent from Solaris electrical cabinet)

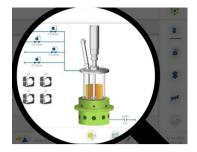

- · Sterile septum with single use membrane for manual feeding
- · Leda: the innovative sterile sampling system for Solaris' autoclavable fermenters/ bioreactors, which allows up to 180 sterile samplings per batch
- Pressure control up to 1.6 bar (with constant gas-in and gas-out flux) available in the 2 and 4 L volumes with jacketed design.

Leonardo

- Innovative SCADA software LEONARDO: a smart and userfriendly controller designed to provide a high level of automated management of the fermentation/cultivation processes
- Full version included in the equipment supply
- Up to 24 units managed in parallel with a unique HMI (24")
- Data extraction in .csv format
- Remote access via PC, tablet or smartphone, with QR code scanning or dedicated portal
- Remote control

Synoptic

- real time 3D view
- parallel control
- manual control

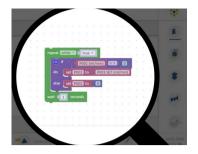

Remote Control

- unlimited number of profiles editor
- unlimited number of devices to be associated

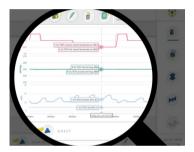

Workflow

- custom phase manager
- parallel visualization
- cascade settings
- peristaltic pumps function assignable from software

Logic Parser

- customized logic functions
- parallel logic blocks and funtions

Trends

- · custom acquisition time
- up to 6 values simultaneously display
- automatic graph comparison

Calibration

- up to three-point calibration
- simoultaneus calibration values for parallel work
